

FEATURES & CAPABILITIES

THE PROMAC LUBE SYSTEM OFFERS A SIMPLE & MAINTENANCE-FRIENDLY
TURN-KEY SOLUTION FOR SUPPLYING SAW GUIDE LUBRICATION.

- Each unit is available in single, double, or quad sector outputs to supply a maximum of 40 saws.
- The units are built from off-the-shelf components (no manifolds) made from corrosion-resistant stainless steel and bronze.
- Adjustable high & low flow settings with gauges allow independent tuning and electronic valve actuation.
- The onboard 60 gallon reservoir is complete with an electronic high/low oil-level switch & visual sight glass.
- An included oil dispensing pump offers quick adjustments to achieve your target oil ratios.
- Oil dividing manifolds can help independently split & adjust oil flow into separate ratios for each flow section.
- The included onboard air injection offers an optional method to help to push lubricant and promote mixing.
